

**NATIONAL INSTITUTE OF TECHNOLOGY CALICUT**

**CIRCULAR**

15/03/2017

NITC is facing serious water scarcity. It is reported from residents in the campus that large amount of treated water is using for agriculture and fish farming which cause serious water shortage in summer. The practice of using treated water in the entire campus for the above purpose should be stopped with immediate effect. If anybody is using the treated water for the above purpose will be viewed seriously. The necessary action will be taken for reporting to higher authorities and disconnecting the water supply connection.
