

NATIONAL INSTITUTE OF TECHNOLOGY CALICUT
Engineering Unit Office

NOTICE

Ref:- Engg/AE1/Water Supply/2018

08.03.2018

The availability of water at our pumping station is reducing day to day due to the bad climatic condition. It is observed that the consumption of water is very essential to reduce it with the co-operation of each consumer. In order to manage the campus water supply effectively, the supply of purified water is re scheduled as follows.

<u>Locations</u>	<u>Time of Delivery</u>	<u>Valve closing</u>
All Hostels, Quarters and Apartments	6.00AM	9.00AM
	6.00PM	9.00PM
Other Locations	8.00AM	1.00PM

The inmates are also requested not to use the precious water for the purpose of gardening, agriculture activities etc. and avoid other wastage of water by closing all taps after use in time. It is also informed that if any occupant uses water other than domestic purpose, the water connection to that occupant will be disconnected and fine will be imposed for unauthorized usage of water.

In addition to this, any leakages or damages of pipe line/specials anywhere in campus, noticed the fact may be reported to the Engineering Unit Office without delay in writing or by telephone.
