ABOUT

India aims to achieve the target of a \$5 trillion economy by 2025. The logistics industry is a vital component of the Indian economy and accounts for 13–14% of the country's GDP. The logistics industry employs over 22 million people in the country and is expected to add another 1.2 million jobs by 2025.

This certificate course introduces the concepts and practices of Logistics and Supply Chain Management. The course has been designed to suit the requirements of prospective employees involved in Logistics and Supply Chain Management activities like sourcing decisions, inventory control, distribution planning, facility location and capacity allocation.

OUTCOMES

- Explain the functions, business processes, performance metrics, and decision phases in a supply chain network
- Differentiate the role of supply chain drivers on performance
- Apply models for materials management, warehouse management and transportation
- Perform data-centric analysis and decision-making of supply chain
- Evaluate case studies based on real-world decisions of logistics and supply chain management.
