

Short-Term Online Course on Digital Supply Chain Management

17-21, July 2023

One week online course

Centre of Excellence in Logistics and Supply Chain Management (CoELSCM), National Institute of Technology Calicut (NITC) is organising a one week Short-Term Course on "Digital Supply Chain Management".

Unlocking the Power of Data-driven Decision Making:

In today's rapidly evolving business landscape, a truly digitalized supply chain is at the forefront of success. It harnesses the wealth of data generated by its processes to make informed decisions that drive efficiency, agility, and competitiveness. Are you ready to embark on this transformative journey?

About the Course:

This one-week comprehensive digital supply chain course is designed to equip you with the essential knowledge and skills needed to navigate the intricacies of digitalization. Whether you're an industry professional seeking to stay ahead or an aspiring supply chain enthusiast, this program will lay a strong foundation for your understanding of key digital technologies.

Building a Solid Foundation:

Machine Learning, Artificial Intelligence, Blockchain, and Internet of Things (IoT) are the cornerstones of digitalization. By grasping their fundamental concepts and applications, you will be empowered to embrace the future of supply chain management.

Experiential Learning:

Through engaging hands-on exercises and practical demonstrations, this course provides you with a tangible experience of working with digital technologies. By actively participating in these activities, you'll learn how to leverage them to enhance supply chain performance.

Unleash the Potential:

Join us on this exciting journey and discover how digitalization can revolutionize your supply chain.

Major Topics

- Supervised, unsupervised and reinforcement learning methods
