National webinar

on

“Oral cancer”: AN INTEGRATED APPROACH FROM BASIC MEDICAL SCIENCES TO ADVANCED RESEARCH”

Date: 17th January 2024

Time: 2.00 to 4.30pm

About this webinar

Cancer is a serious public health issue all over the world. "Globally, oral cancer is the sixth most common type of cancer with India contributing to almost one-third of the total burden and the second country having the highest number of oral cancer cases". Members interested in learning about oral cancer will have a greater chance to listen to and understand basic medical information, current research directions, and preventive medicine from anatomist, pathologist, biomedical researcher, and community medicine doctors. A chance to learn everything there is to know about microscopic and macroscopic anatomy, physiological function, pathology, prevention, research possibilities, and obstacles. Attending this webinar may help you comprehend oral cancer more holistically, allowing you to learn in whole and relevant settings.
