Electric Discharge Hybrid-Machining Processes

Fundamentals and Applications

Edited by **Basil Kuriachen**, NIT Calicut, India, **Jose Mathew**, NIT Calicut, India and **Uday Shanker Dixit**, IIT Guwahati, India

Among the non-conventional hybrid machining methods, electric discharge machining (EDM) is a thermal energy based non-conventional machining process, in which material is removed due to the repetitive controlled electric sparks produced between tool and work piece. This book provides a comprehensive coverage of various hybrid EDM processes along with working principle, process capabilities, applications, advantages, limitations, current research trend, and future scopes for research of each of the processes. It also includes EDM based Hybrid Processes currently prevalent in industries and in queue for adaptation by industries as well.
